

Pupils from Easdale Primary School learned all about sediments and survival in Antarctica from PhD students Lindsay Vare and Suzie Cox. t12sam02

SEE AROUND SAMS

THE SAMS open evening has become a firm favourite in the Lorn calendar.

During National Science week the Scottish Association for Marine Science (SAMS) opens up the doors of its fantastic new building at Dunstaffnage and invites schools and the public at large to share its work and the wonder of the things its scientists are discovering.

During the dayeight school parties were treated to all kinds of 'hands-on' fun.

Pupils could try on Antarctic survival gear for size and learn about the creatures that the scientists are studying.

Hopefully this will attract more and more

SAMS scientists Gail Ashton, Symon Dworjany and Coleen Suckling. t12sam03
