

Burnside

JOINERS & BUILDERS

"You only get what you pay for" is a fond saying of joiner Willie Kerr of Burnside Joiners and Builders . And you certainly get something special when you pay for one of Willies cabin sheds. From start to finish, the range of stunning sheds are made by experienced craftsmen and are of such good quality they last through even the severest stormy weather. The plated roof trusses are made up in Willies workshop where they are all glued, and customers have the choice of either a pitch or sloped roof. Burnside Joiners and Builders also construct chalets in a similar way to their sheds, with the inside insulated with log lap or gyproc finish and comprise of two bedrooms, toilet, shower and an open plan kitchen and lounge area or can be built to clients requirements, and we guarantee to be wind and water-tight. Along with cabin sheds and chalets they make garages and outdoor childrens playhouses as well as providing all kinds of joinery and building work. Models of the beautiful cabin sheds can be viewed at the MRC shed in Barcalldine at the Burnside Joiners and Builders workshop.
