## Dr Alastair Hall

Chartered Psychologist: Dip CBT (Dist)

Cognitive Behaviour Therapy (CBT) is now well established as the first line treatment for depression, anxiety and a range of other psychological disorders (NICE, 2005, 2004).

How you think about a situation or a problem can affect how you feel physically and emotionally and how you behave. CBT helps you to identify and correct unhelpful patterns of thinking. This helps reduce unpleasant feelings and leads to more adaptive behaviour.

If you are feeling depressed or anxious and would like to find out if CBT might be a suitable treatment for you call, text or email:
